Level 1 DBA Accreditation Program

This year CADRE and the IUA are offering the opportunity for members of the user group community to test their CA Datacom and CA IDMS knowledge by taking an accreditation exam while attending the CADRE/CA Datacom® and IUA/CA IDMS™ Technical Conference. For everyday users of the database systems, exam preparation should be minimal. For newer users, please reference the web-based training materials located on the Broadcom Learning Management System (LMS) and review the following content:

- ***OnDemand CA IDMS/DB: New DBA Fundamentals 200 Bundle*** (Course Code: 06IDM2053B)
- ***CA IDMS/DB Database Version 19.x: Database Navigation 200 Bundle*** (Course Code: 06IDM2052B)
- ***CA Datacom®: Database Key Concepts 200***: (Course Code: 06DCM20130)

To access the LMS system through Broadcom's Single Sign-On platform go to https//www.broadcom.com. Specific LMS instructions can be found HERE.

Upon passing the exam, participants will receive a Certificate of Accreditation and a Digital Badge. This will be the first of many accreditation opportunities to come in an effort for our customers to build upon their knowledge and skills.

Please note: In order to take the exam, users must register as a member of either CADRE and/or the IUA communities, and must also be registered and in attendance at the conference. When registering for the conference, please indicate if you intend to take the exam, and more details will be sent to you.
