

Automation Newsletter - December 2020

The latest product news, links to webinars and roadmap replays, as well as authoritative articles by our automation experts.

New Capabilities For Automic Automation Intelligence

The Latest Automic Automation Intelligence release introduces the “Universal Connector Framework”, which allows customers to create integrations into their home-grown scheduling products, black-box applications, and more, further broadening the scope of source data to drive predictions in service delivery through workload automation. Automic Automation has also been added to the existing support for IBM Workload Scheduler (IWS) for mainframe and distributed, AutoSys Workload Automation, CA-7 & Jobtrac mainframe scheduling, and Tidal Workload Automation.

End To End Automation For Your Data Pipelines

Leveraging the value of data is the most important challenge for many companies today. However, managing data pipelines is not easy; most IT organizations are still spending more time getting the data rather using it to create business value. Discover how Broadcom helps to get end-to-end control on data pipelines, streamlining the continuous transformation of raw data into valuable insight.
