PRODUCT ANNOUNCEMENTS

Symantec Named Top Player in Radicati Group's APT Protection and Web Sec Industry Report

Symantec, a division of Broadcom, is pleased to announce that we have again received Top Player honors in the newest product ranking conducted by The Radicati Group in the areas of Advanced Persistent Threat (APT) Protection and Web Security. These awards take on added significance in that it marks the 7th time that Symantec has emerged as Top Player in Radicati's annual comparison of APT Protection vendors and the 14th year it was named Top Player when it came to Web Security.

Symantec's New Web Protection Suite: Providing Choice

IDC highlights the announcement of Web Protection Suite and gives kudos for giving customers the flexibility and choice. "Security can be applied by an on-premises appliance, via an edge proxy, or via cloud proxy, or all three in a hybrid approach that is dynamically configured based on policy. It provides choice to enterprise customers that may have had few viable alternatives in the past."

Improved user interface, Policy Based Encryption (Email Security)

On April 29th a new visual update for Secure Portal delivery of encrypted email content will occur. Secure PDF messages will now support the original message format (no longer just being plain text). Users can choose to toggle back and forth between the old and new interface. There is no change in functionality or service with this visual update.

EVENTS

Packets or It Didn't Happen: Network-Driven Incident Investigations

The way we handle incident response has changed in recent years. With it, so has the role of network data in incident response investigations. In this webcast, SANS Senior Instructor Jake Williams and Symantec's Broadcom's Alan Hall examine the use of network traffic capture in today's incident response environment.
