

## Symantec Identity Security Newsletter

September 2020

### Join Us for Our Identity Security Virtual User Group on Wednesday, September 16

Want to hear the latest news and updates from Symantec Identity Security? [Please join](#) our experts from the Product Management and Solution Engineering teams on Wednesday, September 16th from 1:00pm - 3:00pm ET to discuss key topics on Privileged Access Management, Authentication, IGA, and SiteMinder. Our Product Management team will share our product strategy and roadmap, and you will get tips and best practices on using our solutions to address identity and access management challenges. This user group will also include a demonstration of our new Security Services Platform that lets you extend your existing solutions as you transition to digital IAM.

### KuppingerCole Virtual Summit - Identity Governance & Administration and Next Generation Access

Have you heard about the [KuppingerCole IGA Summit](#)? This virtual event, which is being held on Tuesday, September 15th from 10:00am - 4:00pm CEST, focuses on the main points of Identity Governance and Administration (IGA), its core capabilities, as well as how to enable and protect digital transformation. Nick Groh, Head of Product Management for Symantec IGA, will be featured during his keynote presentation, "Evolving Data-Driven Decision Making Beyond Identity Management" from 10:50am - 11:10am CEST. Immediately following the session, Jim Taylor, Head of Product for Identity Security, will join Martin Kuppinger for a 20-minute interview to discuss the future of IGA. We hope to see you there! If you aren't able to attend due to the time zone, we'll send a link to the recording in our next monthly newsletter.

### Privileged Identity Management: Are you where you need to be?

Want to learn more about the current state of Privileged Identity Management? Watch our 3-part on-demand web chat series, featuring Merritt Maxim, VP, Research Director at Forrester, and Clayton Donley, VP of Symantec Identity Security, to understand how privilege is changing and how you can build a Zero Trust organization.

### VIP Migration to Google Cloud Platform (GCP)

As we announced in early July, VIP is migrating to GCP by early 2021. As part of the migration process, Symantec is providing a method for testing your migration readiness. This can be done [between November 1, 2020 and November 15, 2020](#). Instructions for completing this test will be posted to the [Testing your VIP environment KB article](#). The IP netblocks needed for connectivity to the GCP service are also now available [here](#).

Complete details about the migration are available in the [GCP migration FAQ](#). This information is updated periodically as we have additional information to provide to you, so you may want to bookmark the link and visit the site regularly throughout this process.

### Recent Symantec SiteMinder Developments

A new validation build of SiteMinder has been posted for you to download and test in your development environment. Capabilities that are available in the build include:

- Improved DevOps via support of the SiteMinder REST interface with the popular open source code generation tool, Swagger Codegen.
- OIDC improvements
  - Ability to restrict OIDC token generation by group membership
  - Greater flexibility for aggregating user attributes from heterogeneous user repositories via support for both the Identity\_Map function and Identity Mapping.
- SiteMinder Administrators can be enabled via user store group membership
- Support for the Policy Server and Access Gateway on Windows 2019 and RHEL 8

Access to this validation build is offered via the Symantec SiteMinder project at the [Validate.Broadcom.com](#) location. We look forward to your feedback!

### Symantec Privileged Access Manager is now listed on National Information Assurance Partnership (NIAP) Product Compliant List (PCL)

This is an important milestone as US Government procurement process requirements includes adherence to CNSSP#11 (Committee on National Security Systems Policy), a binding national policy for evaluation processes applicable to Commercial-Off-The-Shelf (COTS) products such as [Symantec Privileged Access Manager](#).

### Stay in Touch
