PRODUCT ANNOUNCEMENTS

Data-Centric SASE: Delivering a Great User Experience

Data-Centric SASE flips the current network perimeter security model on its head. It offers a new architecture that places specially adapted security assets closer to where users, applications, and data are located right now (out on the internet), as opposed to where they were 10 years ago (within a private network).

Webinar: Level Your Risk with Risk Levels

You are likely using website classification and categorization to drive your web security policies...good for you! But are you missing out on the power of Risk Levels? Watch Symantec threat experts, Henk van Achterberg, Jeremy Follis and Bret Jordan's lively webinar on how to leverage the power of Risk Levels to improve your threat detection.

Control without Complexity: Improving Network, Information & Endpoint Security

With organizations reporting increasing security costs and complexity, lack of security staff and too many independent tools to monitor and manage, it is now more critical than ever that security leaders build a comprehensive and highly effective threat protection infrastructure for their enterprises.

Action Required - Your ABRCA Root Certificate

This letter is your sixth reminder that the root certificate for one or more of your Symantec products will be expiring (attached is the original email dated February 18, 2021). Below you will find instructions as to how to update each affected product's certificate. You are advised to take action as soon as possible to avoid any system failures when the certificate(s) expire.
