

## PRODUCT ANNOUNCEMENTS

### Symantec VIP - GCP Migration Now In Progress

In order to set the foundation for stronger integration with our enterprise security solutions, Symantec VIP is moving to the Google Cloud Platform (GCP). The migration process has begun, and you will receive several email notifications regarding the timing of your migration. Complete details about the migration are available in this [FAQ](#). This information is updated as needed, so you may want to bookmark the link. Also, please subscribe to <https://vip.status.symantec.com> and select your VIP Cloud services to be notified in real time about the status of the migration.

### New Symantec SiteMinder Videos

For recent releases of SiteMinder, we have been creating short videos of some of the more anticipated features and publishing them within the product's technical information. To find these videos, you can navigate to the [SiteMinder technical information](#) site and then search for "video." Happy viewing!

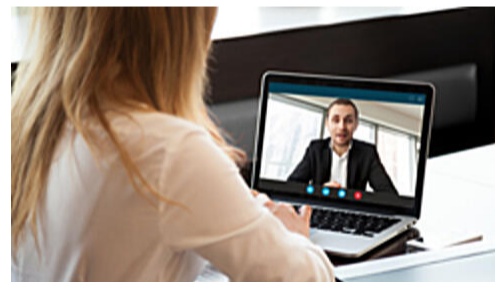

### New Identity Security Overview Video

Watch our new Symantec Identity Security video! Learn how our solutions increase convenience, security, and velocity, and allow you to continue to rely on Symantec to protect your most valuable assets.

### Upcoming Webinar - Zero Trust: How it Works

Is your organization focused on Zero Trust? Join Vadim Lander, CTO of Symantec Identity Security for a continued discussion on Zero Trust within Identity and Access Management. Part 2 of this [webinar series](#) covers how Zero Trust works in the context of API infrastructure with continuous analytics and authorization within every session.

### APJ User Group - VIP Intelligent Authentication

With remote working becoming the norm, the ability to analyse and detect potential risks as part of Zero Trust and Continuous Authentication frameworks has never been more important. Did you know Symantec VIP Intelligent Authentication is able to predict and protect against potential threats?
