Symantec Secure Web Gateway Security: Bet on a Winning Hand

If you work in security long enough, you'll hear it all, especially when you've spent years as the market share leader as we have with our Secure Web Gateway business. But when you have a winning poker hand, it's often wise to remain confident and let others bluff because, in the end, the cards will play out and results will be the same.

Why Symantec SASE?

Protecting data in flight between endpoint and service is one of the primary objectives of SASE (Secure Access Service Edge). Find out about how Symantec Network Security solutions provide effective and innovative "defense-in-depth" protection against advanced threats that may get past a single endpoint.

SERVICE ANNOUNCEMENTS

Action Required: Your ABRC Root Certificate

This notice is to inform you that your root certificate for one or more of your Symantec products will be expiring before the end of 2021. Below you will find instructions as to how to update each affected product's certificate. You are advised to take action as soon as possible so that you do not incur any system failures when the certificate(s) expire.

Important update, Email Security.cloud migration to GCP, Phase 2 cancelled

After careful review, the planned Phase 2 migration of the Email Security.cloud service to Google Cloud Platform has been cancelled. We are pleased with the current levels of performance and stability after the successful Phase 1 migration (April 2020) and will continue delivering and adding to the service based on the current infrastructure. Read the updated FAQ for more information.
