## PRODUCT ANNOUNCEMENTS

### SolarWinds Attacks: Stealthy Attackers Attempted To Evade Detection

In the first of a series of follow-up analysis on the SolarWinds attacks, we take a look at how the attackers disabled security software and avoided detection. As we continue our analysis on the tools used in the SolarWinds attacks, one of the most striking aspects we've noticed is how careful the attackers were to avoid drawing attention to themselves.

## EVENTS

### Webinar: Enhanced Application Visibility and Control with your Secure Web Gateway

Collaboration apps shouldn't become unsupervised channels for information exchange. There can be an implied company endorsement when an employee "likes" social media content. Data leakage can happen when developers share information. Join our experts as we demonstrate our latest SWG enhancements.
