Threat Hunter White Paper

To combat today's sophisticated threats, organizations need more than just Endpoint Protection Platforms and Endpoint Detection and Response (EDR) solutions. They need new tools to protect them against their blind spots – one of which is the attack in your organization that you cannot see.

Webinar: Predictions for 2021 - The Past is Prologue

There is a single word that describes the threat landscape in 2020. Ransomware. There has been no bigger threat to a business or organization, or anything quite as profitable for cyber criminals in 2020. So, will that be the biggest threat in 2021? What else should security professionals be worried about?

SERVICE ANNOUNCEMENTS

Symantec Endpoint Security migration to the Google Cloud Platform

If you use the on-premises Symantec Endpoint Protection Manager (SEPM) managed solution only, the following information **does not apply to you**.

Symantec Endpoint Security will migrate from Amazon Web Services (AWS) to the Google Cloud Platform (GCP) with a tentative date of early **December 2020**. The Broadcom move to GCP increases availability, performance, and scalability. For the latest information, read the FAQ.
